# Hazardous Weather

Isolated thunderstorms are anticipated over the higher terrain and adjacent plains of West Texas and Southeast New Mexico this afternoon and evening. Any storms that do develop will be accompanied by frequent lightning, gusty winds, and brief, heavy rainfall.

High pressure aloft will increase over the region and help limit thunderstorm activity to mainly the mountains and lowland areas west of Deming. Periods of heavy rainfall with localized flooding will still be possible where storms occur. Winds will be from the west at 5 to 15 mph. Temperatures will continue to be warm with middle and upper 90s across the lowlands middle 70s to middle 80s in the mountains.

# Weather Warning/Advisories Issued

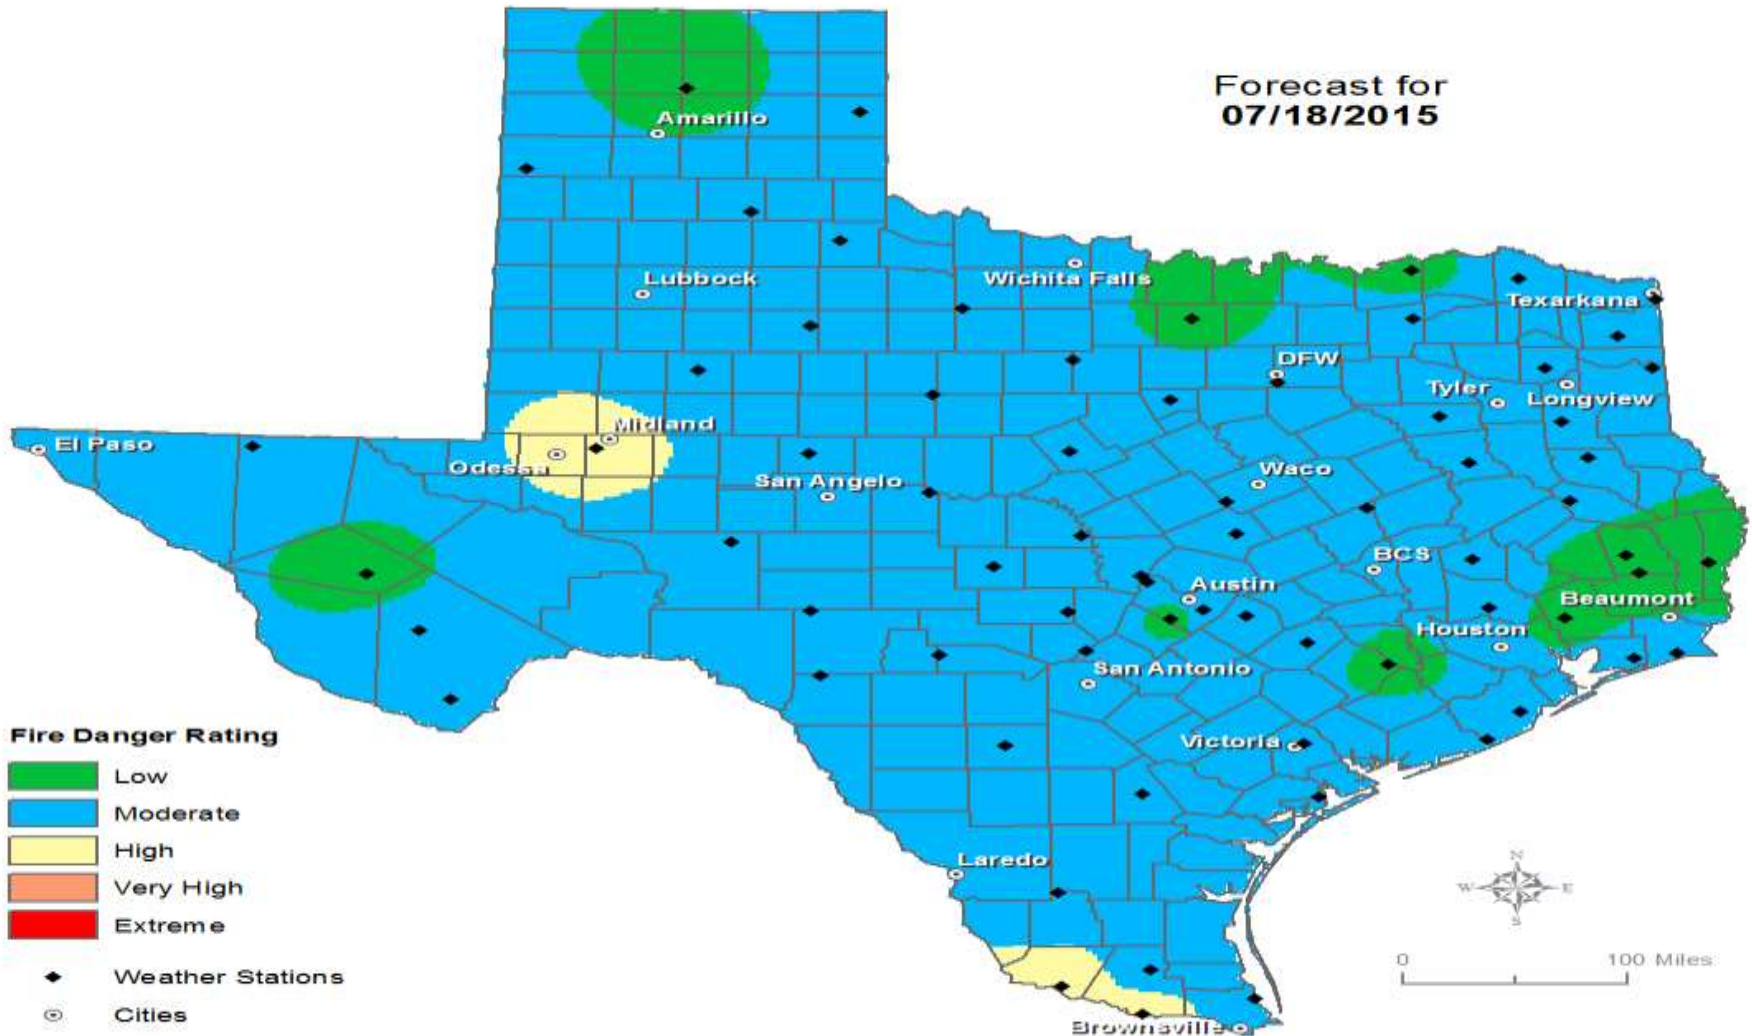

DATE	WARNING TYPE	LOCATION
